Acknowledgements

I would like to express my sincere gratitude to Mr. Avishek for their guidance and support throughout this project. I am also thankful to my family and friends for their encouragement and motivation. This project has helped me gain valuable knowledge about Artificial Intelligence, Natural Language Processing, and Machine Learning and has given me an opportunity to apply these concepts to a real-world problem.

About Me..

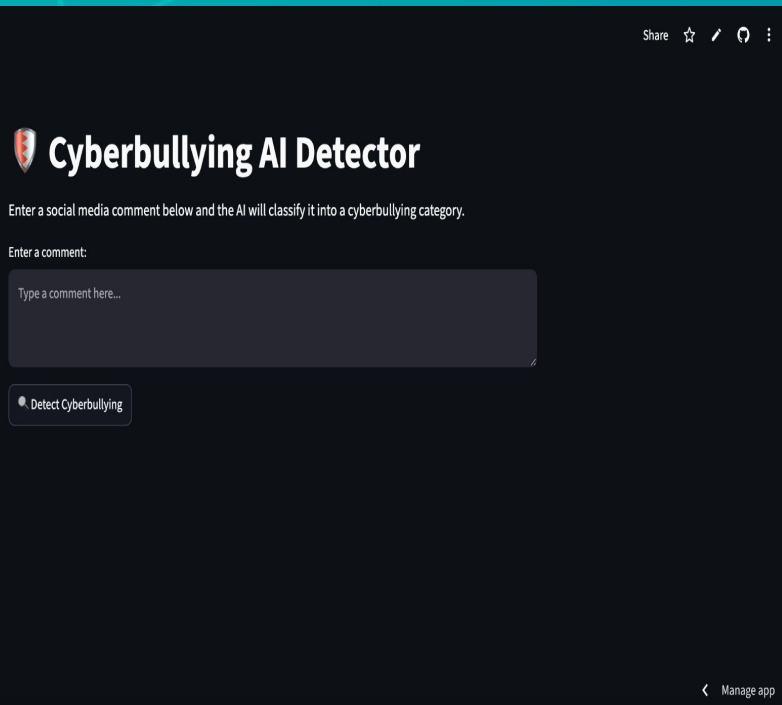

Hi! I'm Kashvi Matanhelia, a 17-year-old Class 12 student at La Martiniere Girls' College, Lucknow. I'm interested in exploring technology and AI and enjoy learning through creative projects. Outside academics, I love swimming and painting, which allow me to stay active and express my creativity.

About My Internship Journey with Clevered..

My experience making this project was amazing and doing it from Clevered made it even more worthwhile. I learned many new things related to AI and had a lot of fun making this project.

About App..

Cyberbullying AI Detector is a machine learning project designed to identify cyberbullying in social media comments.

How do I use the App?

Image 1

Cyberbullying AI Detector

Enter a social media comment below and the AI will classify it into a cyberbullying category.

Enter a comment:

I hate you.

 Detect Cyberbullying

**Add the sample text
and press the DETECT
CYBERBULLYING
button.**

The background of the slide is a solid teal color. Overlaid on this background is a network diagram consisting of numerous small, light-blue circular nodes connected by thin, light-blue lines. The nodes are distributed across the slide, with a higher concentration on the left side, creating a sense of a complex, interconnected system.

Thank you!
